

Talking Tactile Tablet

US patent no. 7,106,220

Touch
Graphics, Inc.

The Talking Tactile Tablet, also known as TTT or T3, enables audio-tactile learning and fun. The TTT connects via USB to a computer. Children and adults place one of many touchable overlays on the TTT. As they explore raised-line and textured images and braille text, users can press down on any part to hear audio descriptions or to interact with programs. Touch Graphics and its partners have created educational applications and authoring tools for the TTT, and it is currently in wide use around the world. The TTT is inexpensive and very easy to use.

Prices for the TTT and applications appear on the back of this flyer

The TTT and applications have been developed through a series of research grants from United States Department of Education, National Institute for Disability and Rehabilitation Research, and the National Science Foundation. These agencies have not endorsed these products.

Talking Tactile Tablet

Applications
and pricelist

- **TTT and Programs - \$799**
Comes with: TTT device, installation CD, Manual and starter applications, including Launcher, SAL Reader, TMAP Reader, TTT Authoring Tool, World Map, Match Game, Snakes and Ladders, SAL Sample and TMAP Sample.
- **National Geographic Talking Tactile Atlas of the World - \$295**
Carried out under supervision of the world's pre-eminent cartographic authorities, the Atlas is a complete reference tool. Includes continents, major countries and country groups, regional US Maps and the Solar System.
- **TTT Authoring Tool - free with TTT**
Allows teachers and others to create their own sheets for the TTT using their preferred method for making tactile graphics. Comes with a design guide and sample sheets.
- **Pack of 15 Authoring Tool template sheets - \$56**
Durable vinyl overlays for making your tactile graphic pictures come to life. Comes with 100 bumpons to mark ID codes for sheets you create with the TTT Authoring Tool.
- **TTT Games - free with TTT**
Three classic board game re-imagined for the TTT. Snakes and Ladders motivates children to learn how to interpret tactile images; TTT Match Game is a challenging audio-tactile memory/matching game for one or two players. TTT Crossword Puzzles allows you to solve crosswords or to create your own puzzles.
- **TMAP Reader - free with TTT**
Used in conjunction with US street maps ordered online. Users place an embossed paper TMAP of any location on the TTT then explore new or familiar neighborhoods through touching and listening. Maps are \$15 each.
- **SAL Reader - free with TTT**
A complete learning platform for Braille, SAL is an interactive tutor for grade 1 and grade 2 literary Braille reading and writing. New modules for music and math Braille, too. For SAL titles and prices, see SAL pricelist.
